Presentation and objective of the questionnaire

The FLOOD CBA#2 project aims at integrating Cost-Benefit Analysis (CBA) into the decision making process for selecting the appropriate and most efficient Flood Protection Standards in flood prone areas. Flood Protection Standards are a key factor of flood management plans since they specify the protection offered to a certain area from flooding.

FLOOD CBA#2 project has been built on the experience gained from the delivery of FLOOD CBA in the framework of Civil Protection Financial Instrument of DG ECHO, which has successfully established a Knowledge Platform for the use of stakeholders dealing with the Cost-Benefit Analysis of flood prevention measures.

One of the goals of the project is to develop a flexible stakeholders' Network ensuring the involvement of key actors from the private and public sector in the activities of the project.

The present questionnaire has been developed under Task B Building Stakeholders' Capacity, Action B3: Assessment of End Users' and Stakeholders' views and needs.

The goal of the questionnaire is to gather stakeholders' different views and perspectives with regards to the decision-making process that is implemented in their regions for the selection of the appropriate standards of defence against flooding.

1. Characterization of the Stakeholder

- a) Stakeholder's official name: [Click here to enter text.](#)
- b) Country and Region: [Click here to enter text.](#)
- c) Type of institution
- Public (in case of need, please specify) [Click here to enter text.](#)
 - Private (in case of need, please specify) [Click here to enter text.](#)
- d) At which level does your institution (or you, if you work as an individual) work for flood risk management? (multiple answers possible)
- Local
 - Regional
 - National
 - International
 - Hydrologic Basin
 - Other (please specify) [Click here to enter text.](#)

2. In which way/at what level is your agency/institution/you involved in flood risk management? (multiple answers possible)

- Decision level
- Plans formulation
- Plans execution
- Emergency response
- Technical support or consulting services
- Other (please specify) [Click here to enter text.](#)

3. Does your country/region have a Flood Risk Management Plan?

Yes No Do not know

a) If No, do you think that there is a need for one?

Yes No Do not know

4. Are you aware of any of these methods used in flood risk management? (multiple answers possible)

- Cost Effectiveness Analysis (CEA)
- Cost Benefit Analysis (CBA)
- Multi-criteria Analysis (MCA)
- Other (please specify) [Click here to enter text.](#)

5. What do you think should be the criteria to be used when deciding on the choice of Flood Protection Options and Standards?

[Click here to enter text.](#)

6. Does your organisation (or you) have the necessary skills for deciding on the choice of Flood Protection Options and Standards?

Yes No Do not know

7. Does your organisation (or you) have the necessary data and techniques for deciding on the choice of Flood Protection Options and Standards?

Yes No Do not know

8. Can you identify possible controversial issues or aspects that need further improvement / clarification concerning Flood Protection Options and Standards?

Yes No Do not know

9. If yes, which ones?

[Click here to enter text.](#)

10. Do you think there are issues that are currently not being addressed in the Flood Risk Management in your Country / Region?

Yes No Do not know

11. If yes, which ones?

[Click here to enter text.](#)

12. Do you think there is a need for additional guidance and/or training on the methods, techniques and data for making choices for Flood Protection Options and Standards?

[Click here to enter text.](#)

13. Are there any additional comments you would like to make about Flood Risk Management in your Country / Region?

[Click here to enter text.](#)

Thank you for your time. FLOOD – CBA#2.
